**West Sunbury Pa. 16061**  
**Public Notice Correction**

In the public notice sent home with students and posted on the school web site, the notice stated that the running average of one location of the HAA5 in the high school was 0.61 mg/l and the standards are 0.60 mg/l.

This was a typographical error, the numbers should be as follows: Standard is 0.060 mg/l and the running average of location code 704 is 0.061. It was a missed zero and the decimal point.

We apologize for this mistake

Sincerely

Jeff Campbell
